

Press Release

The Founding Fathers in Paris on iPhone/iPad

On the occasion of the 237th celebration of American Independence, Mobile Itineraries, publisher of the Blue Lion Guides (www.bluelionguides.com), announces the publication of an app dedicated to "The American Revolution in Paris: In the Founding Fathers' Footsteps."

The app will be available for download on the App Store for iPhone and iPad. Written by three American authors and guides living in Paris, the app walks through the main spots of the Revolution-era American presence on Paris's left bank. From the statue of Jefferson in front of the Hôtel de Salm, which inspired the design of Monticello, to the Hôtel de York, where the Treaty of Paris was signed, to the Luxembourg Palace, where Thomas Paine was imprisoned, and among stories of Benjamin Franklin, John Adams, Thomas Jefferson, John Paul Jones and Lafayette, the tour evokes the great events that contributed to American independence and the people (American and French) who made them happen.

The app will include:

- original text
- audio (non-synthesized)
- maps
- images
- practical info (restaurants, etc.)

Antonio Ca' Zorzi, founder of Mobile Itineraries, states that "this app explores the story of the lasting friendship between the two countries and the marks of American history in the City of Lights."

Mobile Itineraries is a start-up based in Chatou (France). The company specializes in the development and publication, under its own brand or on behalf of established institutions, of cultural and tourism guides in the form of mobile applications. The apps are available for download from the App Store of iOS (Apple) and Google Play (Android).

Shari Leslie Segall, Rebecca Brite and Pam Grant are three American authors and guides who for many years have been giving this same tour in person and continue to do so for the pleasure of their guests.
